-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 5.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1 – 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miranda et al (USPN 5474783). The claims are drawn to composition and transdermal delivery device containing said composition. The composition comprises an opioid analgesic and another agent. The other agent is recited to be non-pemeant, and either an emetic, nauseant, or bitter tasting substance. The composition further comprises a vehicle, which will include both agents and a penetration enhancer. Claims 10 – 13 and 15 are drawn to a transdermal device containing the opioid composition. The device can either be a monolithic device or a reservoir system. The device is recited to contain buprenorphine, atropine and a penetration enhancer.

Miranda et al discloses a transdermal device containing a composition comprising as possible active agents, buprenorphine and atropine. The device of the reference can either be

Art Unit: 1615

monolithic or comprise a reservoir system, but will in both instances comprise a backing layer that is respectively impermeable. The formulation further comprises penetration enhancers, and other excipients common in the art (Abstract; col. 4, lin. 3 – 5, 29 – 44; col. 11, lin. 1 – 8; col. 11, lin. 37 – 41; col. 12, lin. 55 – 60; col. 14, lin. 17 – 20; examples; claims).

Though the reference teaches the general composition of atropine and buprenorphine and a penetration enhancer it does not teach the intended use of applicant. Applicant claims that the atropine (or an analogous substance) is used as a distressing agent that causes distress to the user. These recitations are an intended use for the composition and are not given patentable weight in determinations of patentable distinction. Applicant claims a composition of matter, comprising an opioid, a separate non-permeant agent, and a penetration enhancer. The examiner has presented by way of prior art a composition and device that is obvious over the claimed invention. Also, Miranda does not explicitly claim the use of atropine and buprenorphine in combination, the reference only suggests their presence as possible active agents, as well as suggesting the presence of multiple drugs at once. One of ordinary skill in the art would have been motivated to follow the suggestions of Miranda to combine the possible agents (atropine and buprenorphine) in order to fight a wider range of ailments. A skilled artisan also would have been motivated to follow the suggestion in the art to include a penetration enhancer in order to better transmit the active agents across and into the skin. It would have been obvious to one of ordinary skill in the art, at the time of the invention to follow the suggestions of Miranda with an expected result of a composition comprising atropine, buprenorphine, a penetration enhancer and a device to transmit it into the skin.

Art Unit: 1615

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Quan et al (USPN 5601839) teaches a transdermal formulation and device comprising a penetration enhancer, an opioid and atropine. Andriola et al (USPN 4666441) teaches a transdermal formulation and device comprising a narcotic and atropine. Fallen et al (USPN 5352456) teaches a monolithic transdermal device and formulation comprising atropine, buprenorphine and a permeation enhancer. Zaffaroni (USPN 3797494) and Gale et al (USPN 5635203) both teach transdermal formulations comprising narcotic substances and atropine.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Micah-Paul Young whose telephone number is 703-308-7005. The examiner can normally be reached on M-F 7:30am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K Page can be reached on 703-308-2927. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7648 for regular communications and 703-746-7648 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1234.
